

DESIGN PROCESS

Whether you choose the Essentials, Signature, or Premium e-Design package, each service follows a thoughtful, collaborative process that ensures your home feels beautifully curated and uniquely yours. You'll also have access to your **Client Dashboard** — a personalized project hub where you can view plans, selections, invoices, and messages all in one place.

STEP
1

Discovery & Consultation

We begin by getting to know you, your space, and your style. You'll complete an **e-Design questionnaire** and share room photos, measurements, and inspiration images. This helps us understand your goals, lifestyle, and budget before design work begins.

STEP
2

Design Development

Based on your selected package, we'll curate your personalized design plan.

- Essentials clients receive one complete concept with a layout and shoppable links.
- Signature clients receive multiple design options, detailed floor plans, and a color or material palette.
- Premium clients enjoy fully customized designs with 3D visuals, trade-only sourcing, and elevated styling details.

Each package includes at least one round of feedback and revisions to refine your design until it feels just right.

STEP
3

Review & Approval

You'll review your curated design presentation through your Client Dashboard, where all boards, links, and layouts are stored. Once you've approved the selections, we'll finalize your deliverables and send your detailed purchasing guide so you can begin bringing the space to life.

STEP
4

Implementation & Wrap-Up

You'll review your curated design presentation through your Client Dashboard, where all boards, links, and layouts are stored. Once you've approved the selections, we'll finalize your deliverables and send your detailed purchasing guide so you can begin bringing the space to life.

Once your design is complete, we'll check in to make sure you feel confident moving forward. You'll also have access to your Nestled Interiors Client Dashboard for future updates, seasonal refreshes, or additional room designs.
